### PRODUCE FAIRY PLAY

Miss Hawke's Pupils Appear in "Cinderella."

An audience that filled every seat in the Belasco Theater witnessed the performance of the fairy play "Cinderella" yesterday afternoon. The production was inder the direction of Miss Hawke, and her pupils were the actors. The play was for the benefit of the National Homeopathic Hospital The play was in three acts and six

cenes, and was preceded by a prologue introducing the different styles of dances from the ballet, through the "Espanita and the "Scotch Fling," to the manner of toe dancing made famous by Genee. It was in this dance that Miss-Elizabeth Forney distinguished herself and showed that, for a child of her years, she has remarkable grace and knowledge of this difficult style. There was not a step that she omitted.

The grande ronde, and all the little ecentric steps were included, and the audience proved by its applause that it appreciated her work. Others that pleased with their dancing in the prologue were Camille Little and Hamilton Bell, in a Spanish dance; the Misses Hargrove and Carnahan, in an Irish jig, and Hamilton Bell and George Abrams, in

fairy play were splendld, and the ensemble groupings, especially in the first and last acts, showed the artistic mind of the producer. That there is a large amount of histrionic genius among her mony was performed at the rectory of pupils was shown by the way Miss Hawke distributed the lines of the play and the characters were good in every

### in the part of the Prince, and Miss For-

Bright Future Promised. The former showed she has profited by the lessons she has had with actors of repute, and that some day she, too, may have her name played in electric lights. Her delivery of the lines was excellent especially when it is remembered that they were all in verse, which adult actors find not the easiest thing to speak well

and with feeling Those in the Play,

### Cooking and Serving en Casserole.

The modern housekeeper has begun to learn that there are other ways of cooking food than by boiling, broiling, or roasting, an of which processes call for high heat. She has come to know that long, slow cooking, at a gentle heat, best conserves the nutritive elements of food and the flavors that render it most agreeable to us. It is this method of cooking that the earthen casserole, with its close-fitting cover, has made possible for us. Then, too, the casserole is the serving as well as the cooking dish; and, besides, as from its nature it retains heat for a long time, the food presented in it may be kept in good condition for the late comer or tardy

Shown in round and oval shapes of various sizes; also deep and shallow construction.
